QUEENSFIELD AI TECHNOLOGIES

6 months Internship Offering in 2023

Company:
QueensField AI Technologies (QF AI) is a young company created by Dr. Arnaud de Servigny. From index building to providing early warning signals in the liquid equity space, we offer various AI solutions to our international clients (Investment banks such as Citigroup, Index providers, Asset Managers) .

Team Presentation:
The new joiner will be integrated into the Research Team, led by Arnaud de Servigny and Jeremy Chichportich.

Example of Achievements:
Building a US index delivering SP500 + 5%. See https://merqube.com/index/MQQFUSAT

Focus:

- Make our proprietary dataset yours and leverage it.
- Use machine-learning techniques to create and polish a quantitative investment strategy.
- Depending on the progress of the project. Learn and Implement the latest methods in Deep Learning (Attention & Transformers).

Who we are looking for:

- A friendly and motivated colleague
- Pursuing a Master degree in the quantitative field
- With a strong interest for machine learning, AI techniques
- Interested in pursuing his / her research as a PhD student (CIFRE Contract).
- Displaying coding skills in Python
